NEW GRANT REPORTS DAFR8020, DAFR8030, DAFR8040, AND DAFR8050 SPECIAL SELECT 1 GRANT OBJECT CODE PROBLEM

The DAFR8020 Grant Activity Description by Appropriation, Fund, and Project Report; the DAFR8030 Grant Activity Summary by Appropriation, Fund, and Project Report; the DAFR8040 Grant Revenue and Expenditure Description by Organization Report; and the DAFR8050 Grant Revenue and Expenditure Summary by Organization Report will be in production August 10, 1996; however, these reports do not print the grant object information properly when the Special Select 1 low-range field contains the selection 'T' (Grant Object), 'TC' (Grant Object and Comptroller Object), or 'TA' (Grant Object and Agency Object). MAIN recommends that the agencies do not use any of these object code selections until problems relating to them have been resolved. MAIN is working with KPMG to correct these problems and will notify the users when the grant object special selects are working correctly.
